SUMMARY

Final-year Software Engineering student and Prompt Engineer at Athena Studio. I have shipped 3 real-world products across web, mobile and AI (ReactJS, Node.js, Flutter, Claude/OpenAI) — a fast, self-driven learner focused on turning technology into useful solutions.

WORK EXPERIENCE

Athena Studio — Prompt Engineer

05/2026 – Present

- **AI Research & Development (R&D):** built an internal AI Influencer system; evaluated and experimented with Generative AI models (Kling, Lyria 3) and the Higgsfield platform to upgrade the video-production pipeline, raising the approved-image rate from 70% to 90%.
- **Operations & Automation:** managed and operated multiple social-media accounts across platforms; set up automated workflows and a strict security environment (Proxy, 2FA), handled operational incidents and standardized runbooks (SOPs).
- **Internal Tooling & Data Analytics:** built dashboards to track account performance, operating costs and account health; automated scheduled data collection with Apify, weekly reporting and UTM link click tracking. Estimated and optimized infrastructure costs (cloud, APIs, databases) based on real usage data.
- **AI Architecture & Internal Training:** built an AI pipeline that automatically summarizes and prioritizes news about social-platform algorithm changes (LLM-based, with fallback providers); researched and authored in-depth training documentation on Multi-Agent architecture and the LangChain framework for the development team.

Automation Land — Flutter Developer Intern

02/2026 – 05/2026

- Owned the entire Flutter client of the CCMG exam-prep app (2,000+ questions, 99+ mock-exam sets matching the Ministry of Construction exam structure).
- Built features: progress tracking, a timed mock-exam mode, a "save wrong answers to review" function, and account login; responsive Material Design UI.
- Integrated APIs from the backend team; collaborated with the backend & deployment teams in an Agile workflow.
- Google Play: play.google.com/store/apps/details?id=com.automation.ccmg.client

FEATURED PROJECTS

Laptop Decision-Support System (AHP) 2026

AI & Machine Learning Developer · Python, PostgreSQL, AHP, AI

- Designed and deployed a laptop-recommendation system using the AHP algorithm, analyzing 5+ criteria (price, performance, design, battery, brand) to rank the best matches for each user.
- Demo: analytic-hierarchy-process-one.vercel.app

E-commerce Platform for Art & Cultural Products 2025

Full-stack Developer · ReactJS, Node.js, Express, MongoDB

- Built a full-stack e-commerce system with 3 core modules: product management, order processing and an admin dashboard; integrated an advisory chatbot.
- Designed a RESTful API with 15+ endpoints, JWT authentication and role-based access (Admin / Customer); integrated PayPal & VietQR payments.
- Demo: art-shop-fullstack-panx.vercel.app

Family Health Handbook 2025

Mobile Developer · Flutter, Node.js, MongoDB Atlas

- Cross-platform mobile app (iOS & Android) to manage health records and medical history for multiple family members under one account.
- Built a full-CRUD RESTful API with lab-result/prescription image uploads; integrated Geolocator + OpenStreetMap to suggest the nearest medical facility in real time.
- Demo: healthbook-53606.web.app

SKILLS

- **Backend:** Node.js, .NET, Express
- **Frontend / Mobile:** ReactJS, Flutter, Dart
- **Databases:** MongoDB, SQL Server, PostgreSQL (Neon)
- **Cloud / DevOps:** Vercel, Render, Git, GitHub
- **AI / LLM:** Claude API, OpenAI API, Prompt Engineering, LangChain, Multi-Agent, Higgsfield
- **Tools:** Apify, Postman, Figma, VS Code, Android Studio

EDUCATION

Ho Chi Minh City University of Natural Resources & Environment (HCMUNRE) 2022 – 2026

Major: Software Engineering

CERTIFICATIONS & LANGUAGES

- **TOEIC 660** — IIG Vietnam
- **Google AI Essentials** — Google (2026)
- **Building with the Claude API** & **AI Fluency** — Anthropic (2026)
- **Prompt Engineering & LLMs** — DeepLearning.AI & Google Cloud
